

**Job Title: Moodle Developer**

Business section: SkillSet

Hours of work: full-time or part-time

Location: Basingstoke office / home

Salary: negotiable dependent on experience.

SkillSet has been designing, developing, and delivering training programmes since 1991. We provide a full range of training services, including training needs analysis, design and delivery of training programmes, eLearning, and learning management systems implementation and support. We cover a wide range of customers from both the public and private sector including BP and the Welsh government. We also work with software vendors to help them improve end-user adoption. Our offices are based in the UK and Prague. We have a fantastic and diverse team that has a real family feel. This is an exciting opportunity to join our expanding team and to shape future growth.

**Job Summary:**

We are seeking to appoint a Web and Moodle Developer on a permanent basis. This is an exciting and varied role which will suit someone with a customer focus and who is a problem solver at heart. The role has two primary functions:

1. to be responsible for the on-going maintenance of Moodle virtual learning environment (VLE), WordPress and Joomla sites for SkillSet customers this includes the servers they run on, and.
2. to be the technical lead for customer implementations of new sites including bespoke plug-in developments.

You'll be confident working to maintain and develop our VLE (Moodle) and other online platforms to support SkillSet customer. If you're into Moodle, love being innovative and enjoy working in a wide range of contexts, then this could well be the next role for you.

**Your priorities will include:**

- Implementation – designing and building new sites including branding and customisation.
- Creation – building new bespoke plug-ins to handle customer requirements.
- Maintenance – keeping all customer sites up to date, including documentation.
- Support – supporting customers with queries and issues.
- Advising – working with customers and internal team members to advise solutions and best practice.

**Who we're looking for:**

- You will have demonstrable experience developing web functionality using the following technologies:
  - PHP, including object-oriented design.
  - HTML, CSS and Javascript.

- Experience of Bootstrap is an advantage.
- You will have experience of designing and implementing Moodle sites, including maintenance, upgrades and plug-in creation.
  - Experience of configuration and plugin development for Joomla and/or Wordpress would be an advantage.
- You will be confident in managing conflicting demands and changing priorities and be happy to work on multiple projects at the same time.
- You have used Jira or a similar tool to track and manage your project tasks.
- You will be experienced in a similar role and/or have a qualification in a relevant field.
- Good communication and interpersonal skills will come naturally to you.
- You will enjoy working in a team but also be able to show that when required you can work on customer projects independently.
